Minutes from Previous Meeting (10/29/22)

In our previous meeting, we asked each member the same 3 scrum questions: What did you do yesterday, what will you do today, are there any blockers or impediments preventing you from doing your work. Since the last meeting was our first scrum meeting ever, we didn't have too many accomplishments to discuss, at least individually. We had done all the backlog, spring, and planning things together as a group.

In terms of future goals, we discussed what we wanted to accomplish by our next meeting and by the end of the sprint. We narrowed down our specific goals by person (which can be found in the agenda), discussed any problems we might be having, and left with a good sense of what each person was planning to do and had accomplished up until that point.
